Introducing SmartSpeech Technology

A collection of features working together to focus on improving speech understanding in all environments:

- Understand more speech in quiet and noise
- Spend less effort on listening
- Fully participate in challenging group conversations
- Enjoy hearing aids that automatically adjust

Stay in Charge

The first fully rechargeable product range from Phonak - the future is on

Better for you

- Access additional hearing performance features only available because of rechargeable technology
- Easy to use

Better for the environment

- Save on average 800 disposable batteries during the lifetime of a pair of hearing aids

Better for your loved ones

- Safer use - no batteries for small children or pets to accidentally get hold of

Features that shine in all technology levels

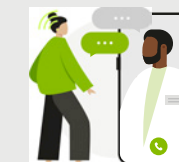

Universal Bluetooth connectivity

Personalized adjustments via the myPhonak app

Step count and activity levels

Remote Care

Classification of streamed audio

ActiveVent Performance

Premium L90

	FEATURES	BENEFITS
SmartSpeech	ActiveVent Performance	Intelligently balances hearing performance and comfort of own voice
	Roger Technology	Provides significant improvement in speech understanding in noise and far distances
	UltraZoom	In noise, zooms in on the voices you are facing
	Motion Sensor Hearing	Automatically adjusts to optimize hearing while walking
	Dynamic Noise Cancellation	Reduces background noise around you for improved hearing
	StereoZoom 2.0 NEW	Seamlessly adjusts for more speech focus in the front in challenging noise
	Speech Enhancer	Boosts soft and distant speech in quiet environments
AutoSense OS 5.0	SpeechSensor NEW	Improves hearing from the side and behind when in noise
	Calm situation	Provides listening comfort and clarity in quiet
	Speech in Noise	Adapts to optimize speech in noisy environments
	Comfort in Noise	Listening comfort in loud situations when no speech is present
	Music	Offers a full and rich sound quality to your favorite tunes
	Speech in Loud Noise	Uses StereoZoom 2.0 to help focus on speech in a loud noise environment
	Speech in Car	Reduces car and road noise
	Comfort in Echo	Reduces disturbing echo so you can hear speech clearly
	Speech in 360° (manual)	Tracks and focuses on the dominant speaker from different sides
	WindBlock	Suppresses wind noise so you can enjoy time outdoors
	WhistleBlock	Eliminates whistling from the hearing aids before it is audible
	NoiseBlock	Reduces background noise without reducing speech
	SoundRelax	Cushions sudden loud or unpleasant impulse sounds
EchoBlock	Removes echo/reverberation to provide a cleaner sound	
Tinnitus Balance	Noise generator to reduce the impact of your tinnitus	
Tap Control	Pause/resume streaming, accept/end calls, and access voice assistant
